Ready---New Mayo Clinic Volume

IT GIVES YOU THE YEAR'S ADVANCES AS DEVELOPED AT THE MAYO CLINIC

This new Mayo Clinic volume gives you all the clinical teachings, all the important 1913 papers of W. J. and C. H. Mayo and their associates at St. Mary's Hospital. It gives you the year's advances in operative technic, in methods of diagnosis, as developed at this great clinic. Although called *the 1913 volume*, many of these papers did not appear until well into 1914, quite a few being scheduled for as late as May and June. You should add this volume to your Mayo files. Read the partial contents:

Constitutional diseases secondary to infections, peptic ulcers, gastric ulcer and gastric cancer, technic of X-ray examinations, Wolff-Jung-hans' test (1914), palliative operations for incurable gastric cancer, recurrences of duodenal ulcer (1914), cholecystitis and pancreatitis (1914), surgery of pancreas, entamebas, stool examinations (1914), factor of safety in intestinal surgery (1914), resection of rectum with preservation of sphincter (1914), ureteropyelography, essential hematuria, renal lithiasis, pelvic kidney, cystic mastitis (1914), histogenesis of carcinoma in ovarian simple cysts and cystadenoma (1914), end-results in opera-

tions for breast cancer (1914), clinical sugges-tions based on study of epithelial hyperplasia in breast (1914), juvenile hyperthyroidism (1914), iodine content of thyroid, depressor substance in serum of blood of exophthalmic goiter patients, effects on bloodpressure of injections of goiter extracts, pathology of goiter (1914), surgery of thyroid (5000 cases), epithelioma of ear (1914), anaphylaxis and asthma, intercarotid paraganglion and its tumors (1914), cervical rib, luetic mediastinitis (1914), empyema, tuberculosis of spine, mal-united fracture of femur (1914), novocain (1914).
